John Bower M. D.
Surgeon.

MEDICAL and SURGICAL JOURNAL of ^{the convict} ~~Her Majesty's~~ Ship *Pyrenees*
 between the 22^d of Decr 1852 and the 16th of May 1853 during which
 time the said *Ship* has been employed in *passage to Fremantle W. A.*

Nature of Disease.	No. of Case	Men's Names, Ages, Qualities, Time when and where taken ill, and how disposed of.	The History, Symptoms, Treatment, and Daily Progress of the Disease or Hurt.
<i>Diarrhoea.</i>	1.	<i>Patrick Archer Aet. 10 months. 9th Jan^r. Off Deal. 10th Jan^r. Died.</i>	<i>Is a very sickly and much emaciated child. The mother states the he has been ill with looseness for the last two months. It may, have been that from their constant attention to the daily wants of the child the parents overlooked the serious insrad which the disease had made on his constitution; or the very great inconvenience which the repayment of the advance money would have occasioned may have rendered it necessary for them to proceed on the voyage; but whatever may have been the cause it seems certain the child would have had a much better chance of recovery on shore than it can have under the present circumstances. At present the child is very much reduced, the countenance is pale and anxious, there is incessant purging stools unnatural in colour and of a very offensive smell; he has been weak about</i>

Nature of Disease.	No. of Case	Men's Names, Ages, Qualities, Time when and where taken ill, and how disposed of.	The History, Symptoms, Treatment, and Daily Progress of the Disease or Hurt.
<i>Diarrhoea</i>	1.	Patrick Archer Oct. 10 Months. 9 th Jan ^r . Off Deal. 10 th Jan ^r . Died.	two months about which time the disease commenced. As the surface of the body was rather cold he was at once put in a warm bath after which small doses of a cordial and astringent nature were given repeatedly but without any good result for although the diarrhoea ceased the child became rapidly worse and expired quietly this morning at half past four. On account of the state of the weather and for several other reasons no post mortem examination of the body was made.
<i>Fracture of Ribs</i>	2.	Peter Palassy, Oct 46. Pensioner 9 th Jan ^r . Off Deal. 17 th Feb ^r . Duty.	This afternoon about one o'clock, while coming aft from the galley, he accidentally fell down the main-hatchway striking against the prison bars in his fall. He was immediately assisted to rise and on examination it was found that the 8 th & 9 th ribs of the left side of the Chest were fractured near the angle. A broad bandage was applied and rest enjoined. 10 th complained much of the pain which hindered him from sleeping. There is only a slight acceleration of the pulse and no appearance of any febrile dis-

turbance. A dose of Castor oil was given
and the bandage which had slightly
slipped was reapplied. 11th Had some
sleep last night - the medicine operated
freely, is much easier. 15th Bandage
reapplied, some distension of abdomen.
Habit. at. Ricini 3ij c. lq. menth. Pip. 3ij.
16th Feels quite easy. 17th Has been
walking about the decks for some time
has no pain on inspiration or on
moving about and is now able to
return to his duty.

Fever.

3.

Samuel Husband
Act. 17. Ordinary
5th Feb. At Sea.
15th March. Duty.

This lad is a native of Barbadoes; he
has been on the Sick List for about
three weeks labouring under a very
severe attack of diarrhoea by which
his strength has been very much
reduced. Last night had some delirium.
There is suppurated redness of the eyes
with slightly increased heat of the body
Pulse 98, weak, Tongue loaded and
white, was purged three times during
the night; some thirst. His head was
shaved and a blister applied to the
nape, small doses of Pulv. Ipec. Co.
were given with a view to check the
diarrhoea, imperial drink and lemon

but has frequent, Continue the Linsin &
arrow root. To have good of the Linsin
at night. 10th. There is still the greatest
difficulty in keeping him clean; the
sores are now beginning to heal, the
slough was only superficial & is detached
confusion of ideas continues at night
especially; tongue & lips begin to
get clearer, the diarrhoea is much
less frequent. To have good wine
with his arrow root continue.
12th. So much better has not passed
urine or faeces in bed for two nights
several boils in groin, abdomen and
neck opened & dressed with lunge. Redness.
15th March - Has continued to improve
slowly but steadily since the last
notice having only had two or three slight
returns of the diarrhoea from errors in diet
the sores healed up quickly, the febrile
symptoms disappeared under the use
of tonic medicines and generous diet,
his flesh and strength have been so
far recovered that he is now able to
return to light duty.

<i>Fever.</i>	4.	Daniel Sullivan. Oct. 16. Boy. 11 th . Feb th . At Sea. 26 th . March. Duty.	cleaner, hardly any confusion of ideas; no cough. Continue the Quinine mixture. 28 th . Has gained strength rapidly under the use of Quinine and Iron and is now able to be employed in light day duty.
	5.	John Rowland. Oct. 18. Convict. 27 th . Feb th . At Sea. 3 rd . March. Died.	This young man who appears of rather a weakly constitution complained yesterday of feeling unwell; his bowels were constipated; his tongue white; pulse rather weak. He has lately been under treatment for common sore throat. A purgative of Croton powder of Jalap with fine grains of Calomel was given by which his bowels were moved freely. This morning complains of great uneasiness; pains in the back and legs; headache and sickness; eyes heavy and dull; conjunctiva suffused; pulse 88 full & soft; skin hot. A diaphoretic mixture consisting of best Ammon. R. S. Nit. & Camphor Mixture given every second hour, cold sponging to the surface of the body. 28 th . Was very restless and uneasy last night and at times delirious. This morning he awakes sensibly. When spoken to but soon relapses into a dull lethargic state; pulse quick and soft; countenance sunk; some tremor and an appearance of timoriveness; has a dull

Died.	pain in the head: the depression and general appearance seemed to contraindicate blood-letting; the head was shaved and kept cool and a brisk purgative administered. Mar. 1st Passed a very restless night, was continually getting out of bed and in his delirium, which was constant, wished to be taken to his friends who he imagined, were close at hand: the same remarkable timorousness and tremor, continued pale with occasional flushes of heat, pulse soft and compressible and quick; Scald of natural warmth. Bowels freely moved by cathartics. A blister was applied to the nape and the Sub. Carb. of Ammonia with a grain of Camphor given. 2nd. Continued low muttering delirium all night, was constantly getting out of bed, is comatose today. Blisters rose well: he makes no complaint and can with difficulty be raised from the low insensate state in which he lies; makes an effort to answer a question but generally falls back before he finishes. Blister was dressed. The ammonia & Camphor to be continued with the addition of two grains of Sulfate of Quinine; Some arrow root with wine to be given at intervals during the day. 3rd. Delirious muttering all night

<i>Fevers.</i>	5.	John Rowland Oct. 18. Convict. 27 th Feb ^{ry} . At Sea 3 rd March. Died.	did not require much restraint to keep him in bed. Countenance pale and becoming sharp, pulse quick and soft the state of the tongue can with difficulty be observed as he cannot be made to protrude it, so far as can be seen it is dark and dry - he is evidently fast sinking. Continues. 11 & 5. The appearances of sinking continued to increase and he expired perfectly comatose.
	6.	Ann Booth Child Oct. 20 Months 2 nd March At Sea 7 th March Died	A pale and unhealthy looking child who has scarcely had a day of health on board the ship. She has been under treatment on several occasions on account of irregularity of the functions of stomach and bowels, and latterly has appeared to improve in her general health, but has not in the least regained flesh: she is still much emaciated. A few days ago she began to complain of her head which is hot; her bowels are constipated; skin rather hot & dry; she has a peculiar expression of countenance and is peevish & irritable; the eyebrows are slightly contracted. A Purgative of Calomel and Pulv. Antimon. was given and its operation assisted by Senega draught. 5 th . Rejections of

With the exception of considerable enlargement of the mesenteric glands all the abdominal viscera were healthy.
<i>Meningitis.</i>	7.	Margaret Palassy, Oct. 2 years. Child. 3 rd March. At Sea 14 th March. Died.	The symptoms of Encephalitis in this little girl are much more marked than in the former case. She has also been under treatment for diarrhoea for some time which yielded easily to the remedies prescribed. She is now evidently suffering great pain; has, from a quiet child, become restless, impatient and irritable the eyes are injected, watery and tumid eyelids kept constantly shut, when opened to look at the state of the eyes she experiences much pain and is unable to bear the light; the eye brows are contracted; she starts in her sleep and frequently screams loudly; the head is bent forward and the arms are constantly being raised to the head. The countenance is pale and tumid; scalp hot; pulse quick; tongue loaded & dry; bowels relaxed

	7.	Margaret Palasy. Child. Aet. 2 years 3 rd March. At Sea. 14 th March. Died.	Dejections greenish yellow thin and watery smelling very offensively. The Antiphlogistic treatment was immediately adopted, calomel given with a view to affect the system; the head kept cool; and she was placed in a warm bath before being sent to bed. 5 th Screams so loudly as to waken most of those around her; dejections continue the same no abatement of the symptoms; the same treatment to be continued. 10 th . Seems rather more quiet although she still screams at night suddenly falling into a sort of stupor and grinding her teeth whilst asleep or rather whilst in that state of stupor a blister was applied to the nape of the neck which has risen well and been dressed with simple ointment: dejections are rather less offensive & more natural the throat does not show any appearance of being affected by the mercury taken small doses of Hydr. c. Crota with Pulv. Antimonialis have been given every night, for several nights, the calomel having been omitted. 12 th . No improvement, she rather gets worse, the restlessness continues; the arms are still tossed about and frequently carried

Died.	to her eyes and head: she cannot now be induced to take any food though a few days ago she ate readily of Sago prepared with preserved milk. 13 th Had an attack of Convulsions last night and another this morning 14 th Passed from one convulsive fit into another and died this morning at an early hour.
<i>Fever.</i>	D.	Alexander Moriarty Oct. 21. Convict. March 6 th At Sea. April 8 th . Duty.	The fever in this case as in many others, made its attack very insidious by the premonitory symptoms being very slight so much so that he walked about as usual, seeming only weak which as he has, has lately under treatment for diarrhoea was supposed to be the result of that complaint. Today he has a peculiar, vacant look; says that he has no pain whatever in head or abdomen; Pulse small, irregular, and not easily counted. Tongue with patches of a yellowish coating. Skin not particularly hot or dry. Eyes heavy and dull. Bowels again loose. A little thirst. So he confined to bed; to have calomel ʒss t̄ij op. sops. Barley water for drink. 4 th . Did not sleep; was restless and with
